Market Overview Nigeria

The following story of two sub-borrowers comes from Africa, Nigeria to be precise. With just over two percent of the fund volume, Africa is barely represented in the portfolio of the IIV Mikrofinanzfonds. One of the reasons for this is that the financial markets in Africa are very differently developed in some cases. Only a few financial institutions there currently fulfil our requirements for a suitable risk/return profile.

This makes stories like those of Joy Famutimi and Abu Mutiatu Olaitan all the more remarkable. A look at the poverty level in the country shows that microfinance is needed in Nigeria. According to the German Federal Agency for Civic Education, the number of Nigerians living below the poverty line of USD 1.90 per day has increased by a further 20 million to 100 million by 2022 – which is almost half of the population. The microfinance institution Advans Nigeria, which focuses primarily on promoting the financial independence of women, is also aware of this.

Joy Famutimi is the proud owner of Eagles Tower College, a prestigious educational institution in Lagos, Nigeria. She used the loan to address challenges such as outstanding teachers' salaries, teaching materials and infrastructure renovation, which are critical to maintaining the high standard of education at Eagles Tower College. The loan has not only stabilized the school's financial situation, but has also contributed to a significant increase in student numbers.

Abu Mutiatu Olaitan is a small trader in Lagos, Nigeria. Thanks to a loan, she was able to expand her business considerably. The efficiency and support of the Advans team was crucial to the growth of her small business and led to a significant increase in income and market presence. Both women would recommend Advans to their friends, reflecting their confidence and satisfaction. We are grateful to be able to count on Advans' work despite the difficult microfinance environment.

Risk Management of the Fund

The risk management of the fund ensures a thorough and comprehensive monitoring of the general and specific risks. Our credit risk management is based on a holistic risk approach. Besides MFIs- and country-specific risks, regulatory and macroeconomic aspects are considered. Currency risks are to a large extent hedged. To diversify the risks, the investments are subject to certain restrictions:

- Maximum investment per MFI: 10 % of the total assets of the IIV Mikrofinanzfonds
- Maximum country weighting: 15 % of the total assets of the IIV Mikrofinanzfonds per country
- Selection criteria: Size of total assets, equity base, loan portfolio quality, profitability and social return

Investment Strategy

The fund invests in loans given to MFIs in emerging and developing countries. The MFIs serve as intermediaries between the IIV Mikrofinanzfonds and the final borrowers. Accordingly, the institutions must be selected conscientiously. The selection process includes a detailed country, financial and sector analysis as well as an on-site review of the MFIs. In addition to financial ratios, credit, default and currency risks, comprehensive sustainability criteria are also assessed. Only those MFI are supported that also meet our criteria regarding ethical and social aspects.

The investments are intended to support the achievement of the following objectives:

Advans, Nigeria

Regulatory Authority	Bundesanstalt für Finanzdienstleistungs- aufsicht (BaFin)
Financial Auditors	KPMG AG, Tersteegenstr. 19–31 40474 Düsseldorf Germany

Memberships and supported standards of the fund manager:

¹² As of 30/06/2023. ¹³ There are two different ways of calculating the share of the respective gender among borrowers: The head count (absolute share) or the share of funds benefiting women and men, respectively (portfolio share). While the absolute share is 80 %, the portfolio share is 50 %. In principle, we consider both metrics to be equally important.

Founded in 2006 by Edda Schröder, **Invest in Visions GmbH** specializes in **financing sustainable investments**. Currently, 885 million euros are under management in the core areas of **microfinance and Impact Investing** (as of November 30, 2023). Through the funds we initiate and manage, we give institutional and private investors access to investments that offer not only financial returns but also a social return and have a positive impact on society and the environment.
